## WHO WE ARE

Power Partners was established in 2019 and delivers safe, high-quality electrical and mechanical consulting engineering services within the built environment and renewable energy solutions.

Our multidisciplinary team brings decades of combined experience across electrical, mechanical, electronic and renewable energy engineering and a dynamic approach to solving engineering challenges across a wide range of industries. In addition, Power Partners consults on long-term commercial solar photovoltaic ("PV") installations.

With offices in Cape Town and Johannesburg, Power Partners has a strong national presence and projects spanning South Africa, the broader African continent, and international markets.

## GRADUATE TRAINING PROGRAMME

The Power Partners Graduate Training Programme is designed to develop the next generation of engineers by providing hands-on exposure to real projects, mentorship from experienced professionals and the opportunity to contribute to impactful work.

### WHAT THE PROGRAMME OFFERS

- An comprehensive 24-month training programme
- Exposure to consulting engineering services across a wide range of industries
